

Gokul K

Software Developer — PHP Laravel Developer — Full Stack Web Developer

Erode, Tamil Nadu +91 6380531946 gokulgokul4457@gmail.com

gokulk.netlify.app — github.com/Gokulk8870 — linkedin.com/in/gokulk887016

Professional Summary

Software Developer with hands-on experience in developing scalable web applications using Laravel, PHP, MySQL, JavaScript, HTML5, CSS3, Bootstrap, AJAX, and REST APIs. Strong understanding of MVC Architecture, Object-Oriented Programming (OOP), Authentication, Authorization, Database Design, SQL Query Optimization, and Secure Web Application Development.

Experienced in building business applications, inventory management systems, billing platforms, and AI-powered database solutions. Passionate about developing efficient, maintainable, and scalable software solutions.

Technical Skills

Programming Languages: PHP, JavaScript, Java, C

Frameworks: Laravel, Flask

Frontend: HTML5, CSS3, Bootstrap, JavaScript, jQuery, AJAX

Backend: PHP, Laravel, Flask, MVC Architecture, REST APIs

Database: MySQL, SQL, SQLAlchemy, Database Design, Query Optimization

Concepts: OOP, Authentication, Authorization, RBAC, SDLC, Secure Coding Practices

Tools: Git, GitHub, VS Code, XAMPP, Laragon

Data Formats: JSON

Experience

Software Developer Intern

KG Genius Labs, Coimbatore

- Developed scalable web applications using Laravel, PHP, MySQL, JavaScript, HTML5, CSS3, Bootstrap, and AJAX.
- Built reusable and maintainable PHP modules following MVC Architecture and OOP principles.
- Developed authentication and authorization systems with role-based access control.
- Designed relational database schemas supporting business workflows.
- Integrated multiple data sources and databases into centralized applications.
- Optimized SQL queries and improved application performance.
- Developed REST API integrations and backend services.
- Implemented secure coding practices and resolved application vulnerabilities.
- Participated in testing, debugging, deployment, and maintenance activities.
- Used Git and GitHub for version control and collaborative development.

Projects

Billing Inventory Management System for Garment Sector

Laravel, PHP, MySQL, JavaScript, jQuery, Bootstrap, HTML5, CSS3, AJAX

- Developed a full-stack web-based Billing and Inventory Management System for garment businesses using Laravel and MySQL.
- Implemented secure Authentication and Role-Based Access Control (RBAC) for administrators and staff.
- Automated invoice generation with GST calculations, sales tracking, and purchase management.
- Designed relational database schemas for products, suppliers, customers, purchases, and sales transactions.
- Implemented real-time inventory tracking with automatic stock updates and low-stock alerts.
- Developed customer management, supplier management, employee management modules.
- Built reporting dashboards for sales, purchases, inventory status, and business performance analysis.
- Applied MVC Architecture, Object-Oriented Programming (OOP), and Laravel Eloquent ORM.
- Optimized SQL queries and improved application performance.
- Utilized Git and GitHub for version control and collaborative development workflows.

GitHub: github.com/Gokulk8870/Billing-Web-Application

Egg Shop Billing Inventory Management System

Laravel, PHP, MySQL, JavaScript, Bootstrap, HTML5, CSS3

- Developed a full-stack billing and inventory management application for retail operations.
- Implemented role-based authentication and authorization.
- Built Billing, Inventory, Customer, Employee, and Sales Management modules.
- Automated invoice generation and stock updates.
- Developed business reporting dashboards and analytics modules.
- Improved database performance through query optimization.
- Utilized Laravel Eloquent ORM and MVC Architecture.

GitHub: github.com/Gokulk8870/eggshop

SQLMate - Natural Language to SQL Query System

Python, Flask, MySQL, SQLAlchemy, Groq API, HTML, Bootstrap

- Developed an AI-powered system that converts natural language questions into SQL queries.
- Implemented Role-Based Access Control (RBAC) for User, Manager, and Admin roles.
- Integrated Groq LLaMA models for Natural Language Processing.
- Executed generated SQL queries securely on MySQL databases.
- Developed dashboards for query execution, history tracking, and result visualization.
- Implemented authentication, authorization, and query logging features.
- Improved database interaction efficiency through automated query generation.

Notes Management Application

HTML5, CSS3, JavaScript, Local Storage

- Developed a responsive Notes Management Application.
- Implemented Create, Read, Update, and Delete (CRUD) functionality.
- Applied DOM Manipulation and Event-Driven Programming concepts.
- Designed a responsive and user-friendly interface.

Education

Master of Computer Applications (MCA)

2024 – 2026

KGiSL Institute of Information Management, Coimbatore

CGPA: 8.1

Bachelor of Science in Computer Science

2021 – 2024

Gobi Arts Science College, Gobichettipalayam

CGPA: 7.8

Achievements

- Developed and deployed Billing and Inventory Management Systems using Laravel, PHP, and MySQL.
- Built secure Authentication and Role-Based Access Control (RBAC) systems.
- Designed scalable database schemas and optimized SQL query performance.
- Developed REST API integrations and reusable backend modules.
- Applied MVC Architecture, OOP concepts, and secure coding practices in real-world applications.
- Experienced with Git, GitHub, Laravel Eloquent ORM, and modern software development workflows.
- Developed AI-powered database applications using Python, Flask, and Large Language Models.
